

Spectrum Systems is a Government IT products, software, and solutions provider. Our product line portfolio represents brand name and industry leaders in design, testing and implementation for data, information, application, and enterprise platform and storage management.

Citrix provides a portfolio of virtualization, networking, and cloud computing technologies that enables virtual workstyles for users and virtual datacenters for IT. These offerings embrace the growing movement towards the government's mobile workforce.

Dell products and services help government IT leaders create and employ state-of-the-art capabilities through IT simplification and innovation. Offering the full line of desktops, laptops, notebooks, tablets, servers, storage, ruggedized solutions, software, printers and desktop accessories.

Deque Systems is a leading technology provider of integrated web compliance solutions that deliver accessibility, quality, privacy, and security to maximize the accessibility of your web enabled systems. These offerings enable assessment of the current state of your web-based offerings and assist in getting nonconforming sites compliant (Section 508 and American Disabilities Act).

Embarcadero offers the ultimate in collaborative enterprise data modeling providing deep native support for major DBMS platforms. The Embarcadero product suite empowers software development and government data management professionals with the industry's most powerful tools for designing, building, optimizing, and running their application and database systems across multiple platforms.

Hitachi Data Systems provides IT technology that is virtualized, automated, cloud-ready and sustainable to improve costs and return on investment and assets for the federal sector. Offering a full product line of storage systems, storage networking, storage management and a suite of Software products for resource management, enterprise asset management and virtualization.

HP brings together an integrated portfolio of software, services, and hardware to create solutions that uniquely empower CIOs to leverage the cloud-enabled world, manage business threats and risk, and deliver competitive differentiation. **HP software** offerings include software testing, security, SOA, network monitoring, records management, data center automation, asset management and service desk. **HP Server and Storage** offering includes entry level servers to highly expandable and scalable products and services.

IBM application management portfolio is instrumental in enabling new automated business processes and improving responsiveness. Offering a variety of tools and services for application development, business analysis, information management, SOA platform, collaboration, testing and deployment providing a robust methodology to the federal sector to maximize quality, efficiency, and speed to market.

iTKO increases agility and eliminates constraints from composite application development. iTKO's LISA platform optimizes the development, testing, and validation of complex enterprise solutions through the use of simulation and collaboration. It empowers government IT staff to perform continuous integration and validation leveraging agile development for higher quality and less risk while removing major system component dependencies.

McAfee solutions deliver complete virus protection and Internet security helping the government in securing your digital world. Offering a product line of security software and appliances that provide protection for networks, systems, devices and data for the department and enterprise communities.

MicroFocus provides tools that enable strategic planning, application overhaul and modernization for enterprise applications and whole mainframe environment migrations. Infuse greater agility and developer productivity that will dramatically reduce the running costs of your business applications and deliver the highest standards of quality to your clients.

Symantec offers streamlined solutions to protect and manage your information assets within your organization. These solutions address government requirements related to security, infrastructure operations, risk management, governance, storage management and business continuity.

Verdasy offers enterprise class security solutions for information assets to protect your data inside and outside of the organization. In addition to proactive security, comprehensive reporting can be conducted on threat incidents, severity level and outcome.

Are You Managing Your Data or Is Your Data Managing You? We specialize in Quality Data Audits, Discovery Analytics, and Storage Management with Data Traffic Audits and Data Economics (ROI/ROA) Assessments to help our clients take control of their corporate assets.

BUILD Applications

Software Design, Development and Testing Products

Assure, Blueprint, CloudOne, Deque, dynaTrace, Embarcadero, EmbeddedPlus, HP Software, IBM/Rational, iTKO, Micro Focus (formally Borland), MKS, Odin Technology, SmartBear Software (formerly AutomatedQA), TestPlant, VersionOne, and WSO2

Services: Quality Assurance, Testing, SDLC Process, and Tool Optimization

MANAGE Systems

Network, Server, and Applications Performance Monitoring and Management, IT Asset and Software Inventory, and Software Distribution Products

Software: Artemis, Asentinel, HP Software, IBM, iTKO, and Micro Focus Products: Dell, Hitachi, HP, Epson, Lexmark, NEC, Netgear, Panasonic, Samsung, ViewSonic, Xerox, and more

Services: IT Asset Management, IT Service Management, and Supply Chain Provisioning

LEVERAGE Information

Platform, Application, and Data Integration/SOA, Business Intelligence, Discovery Analytics and Data Warehousing Products

Chainbridge Technologies, CorreLog, Embarcadero, Enterprise Elements, HP Software, IBM Software, Idera, Industrial Medium, Jacada, MetaVis, Micro Focus, NewsGator, Pragmatica Innovations, Qbase data tools, Safecore (InBoxer), SCO, and WCC

Services: Data Quality Audit Assessments, Data Warehousing, and Business Intelligence

SECURE IT Assets

Information, Application and IT Infrastructure Protection Products

Cenzic, CorreLog, HP Software (SPI Dynamics), IBM (Watchfire), McAfee, netForensics, ProInfo, Security Innovation, SonicWALL, Symantec, Trustwave, and Verdasys

Services: IT Security Services, Enterprise Information Protection, and SOA Security

VIRTUALIZE the Enterprise

Virtualize Applications, Virtual Desktop Infrastructure (VDI), Storage, Servers and the Collaborative Environment

Citrix, Dot Hill, Hitachi Data Systems, HP Servers and Storage, HP Software, IBM, iTKO, NewsGator, Symantec, and WSO2

Services: IT Security Services, Data Traffic Audits, Data Economics Assessments (ROI/ROA), Enterprise Information Protection, and SOA Security

FEDERAL CONTRACT VEHICLES

- GSA FAS IT 70 Schedule Contract #GS-35F-5192G
- GSA SmartBUY – Enterprise Software Initiative (ESI) FA8771-07-A-0304 Data-at-Rest (DAR) Encryption, McAfee/ SafeBoot Products
- Social Security Administration: BPA – Contract #SS00-08-40006 HP Software Products and Services
- US Army: Information Technology Enterprise Solutions-2 Services (ITES-2S)
- Department of Homeland Security: FirstSource and EAGLE
- NASA: Solutions for Enterprise-Wide Procurement IV (SEWP IV) GWAC

Spectrum Systems' Cooperative Purchasing Addendum to our GSA Schedule GS-35F-5192G allows state and local government entities to purchase products and services directly from that contract.

NAICS: 423430, 443120, 511210, 541511, 541511, 541512, 541513, 541519, 561621, 811212
