**July 2010**

Manufacturer	Key Product / Category	Product Description
<b>Artemis</b>		Enterprise portfolio, project and resource management software products
Artemis	Artemis 7	A web-based project portfolio management software that provides the framework for investment planning and control solutions.
Artemis	Artemis Views	An enterprise project and resource management solution delivers enhanced project management capability through a single, synchronized product suite.
Artemis	Artemis 9000	A project management system IBM Mainframe and Windows NT Systems used to develop custom applications that help control and run their businesses.
Artemis	Artemis Ontrack	A computer-based simulation workshop, trains project leaders and team members on both the hard and soft aspects of project and resource management.
<b>AutomatedQA</b>		Quality assurance tools that cover the complete application lifecycle including requirements, deliverables, tests, defects, and support
AutomatedQA	TestComplete	An automated testing tool with support for unit, functional, regression, distributed and HTTP performance testing at the project level.
AutomatedQA	AQtime	A performance profiler and memory debugger that provides a single solution for detecting performance bottlenecks and memory leaks within managed, unmanaged and mixed-code applications. AQtime supports Microsoft Visual Studio, .NET, ASP.NET, C++, VB, Borland Delphi, Borland C++, and more.
AutomatedQA	Software Planner	An application lifecycle management (ALM) tool for software development including requirements, deliverables, tests, defects and support.
AutomatedQA	Automated Build Studio	A release management system that provides an easy and visual way to automate the software development build and deployment process. Users easily create visual macros by dragging and dropping pre-built operations.
AutomatedQA	AQtrace	An error reporting and resolution system that automatically handles errors in your applications and reports these errors to your software development team.
<b>Blueprint</b>		Software development requirements workbench that visually defines, simulates, validates, and publishes requirements to facilitate distributed software development collaboration
Blueprint	Requirements Center	An integrated collection of requirements editors that enable requirements authors to define all requirements within a single repository using patented visualization technology that enables authors to visually simulate to ensure stakeholder understanding.
<b>Borland (now Micro Focus)</b>		A portfolio of software development life cycle (SDLC) tools including requirements definition & management, testing and ASQ, and change management solutions
Borland	TeamDefine	A requirements tool that brings software requirements to life with interactive simulation
Borland	CaliberRM	Requirements management software that facilitates collaboration, impact analysis and communication throughout the software development lifecycle, helping to manage expectations and ensure that applications meet end users' needs.
Borland	Silk	An integrated suite of quality assurance, control and management software. The suite includes: <b>Borland SilkCentral Test Manager; Borland SilkTest and Borland SilkPerformer.</b>
Borland	StarTeam	A software change and configuration management tool, designed for both centralized and geographically distributed software development environments.
Borland	Together	A visual modeling platform for software architecture design that enables you to analyze, design and implement flexible and maintainable software architectures that can be easily modified as requirements change.
Borland	VisiBroker	A CORBA ORB-based environment for developing and deploying distributed applications that supports development in Java™, C++, and .NET languages including Microsoft C++ and C#.
Borland	AppServer	A highly available, scalable, embeddable application server for J2EE that is well suited for high-end J2EE applications that demand high availability and transactional scalability, in both embedded and enterprise deployments.

**Spectrum Systems Product Catalog**  
**Key Manufacturers and Key Products**

**July 2010**

Manufacturer	Key Product / Category	Product Description
<b>Cenzic</b>		
Cenzic	Hailstorm	Software and SaaS solutions that protect websites against hacker attacks through Black Box testing of web applications
		Enterprise- or desktop-level software solutions that protect websites against hacker attacks through Black Box testing of web applications
<b>Chainbridge Technologies</b>		
Chainbridge Technologies	SQLDBI	Software platform automates the development and deployment of access-controlled, web-based, database applications
		A software product that allows users to quickly design and implement complex web-based, database applications via a graphical configuration utility.
<b>CorreLog</b>		
CorreLog	CorreLog Security Correlation Server	Security information and event management (SIEM) solution combined with deep correlation functions
		Combines log management, Syslog, Syslog-NG, SNMP, auto-learning functions, neural network technology, proprietary semantic correlation techniques and highly interoperable ticketing and reporting functions into a unique security solution. Solutions are available for: Mainframe, Windows, Unix & Linux, and other devices.
<b>Coverity</b>		
Coverity	Coverity Static Analysis	Source code analysis solution that improves software quality and security
		Leverages the most sophisticated, patented analysis techniques for finding and eliminating hard-to-spot, crash-causing defects in your code at the earliest phase of the development lifecycle
Coverity	Coverity Dynamic Analysis	Automates defect identification in multi-threaded Java applications as they execute in test environments
Coverity	Coverity Build Analysis	Enables developers to gain control and visibility by identifying problems and inefficiencies in the assembly process
Coverity	Coverity Architectural Analysis	Helps to maximize development team productivity and agility by making both new and legacy code bases easier to manage, change and re-use over time
Coverity	Coverity Integrity Center	Combines the industry's most sophisticated software analysis capabilities in a single offering, designed to help you ensure quality, security and performance of your code throughout the software development lifecycle
<b>Deque</b>		
Deque	Deque Ramp	Web site accessibility compliance (Section 508) automation tools
		Desktop solution for individual developers or testers responsible for ensuring their websites comply with Section 508 and/or the Web Content Accessibility Guidelines.
Deque	Deque Undoc	Transforms PDF document's content, layouts and graphics into XML and HTML for the web designed for accessibility.
Deque	Deque Worldspace	A comprehensive and scalable enterprise tool that automates testing for Accessibility (Section 508 and WCAG), privacy, quality and security for large enterprise websites and applications.
<b>Embarcadero (CodeGear)</b>		
Embarcadero	All-Access	IDE and database tools to design, build, optimize, and run software applications and databases across multiple platforms and programming languages
		Access all Embarcadero tools from a single interface and experience the power of on-demand tooling.
<b>Design and Architecture Tools</b>		
Embarcadero	ER/Studio Enterprise	A visual modeling tool for the analysis, design, creation, and maintenance of database applications.
Embarcadero	ER/Studio Data Architect	A data modeling tool for that enables companies to design, understand, discover, document, and re-use data assets.
Embarcadero	ER/Studio Business Architect	A process and conceptual modeling tool that enables architects to easily document business processes and how they access data.
Embarcadero	ER/Studio Portal	A web-based query and reporting tool to access and search the ER/Studio Repository for improved understanding of metadata, object whereabouts, and data usage.
Embarcadero	Schema Examiner	Automated error checking that performs a comprehensive set of diagnostic tests that validates the schema to ensure that the rules of the relational model are enforced.

**Spectrum Systems Product Catalog**  
**Key Manufacturers and Key Products**

**July 2010**

Manufacturer	Key Product / Category	Product Description
<b>Embarcadero (CodeGear) (con't)</b>		IDE and database tools to design, build, optimize, and run software applications and databases across multiple platforms and programming languages
<b>Rapid Application, Web and Java Tools</b>		
Embarcadero (CodeGear)	RAD Studio	A complete rapid application development solution with everything software developers and ISVs need for building native Windows®, .NET, Web, and database applications.
Embarcadero (CodeGear)	Delphi	A development environment for software developers and database application developers who need to rapidly deliver high performance and easy to maintain Windows applications.
Embarcadero (CodeGear)	C++ Builder	A solution for rapidly building native Windows applications using the C++ language and libraries.
Embarcadero (CodeGear)	Delphi Prism	New Delphi, Visual Studio-based development solution for .NET and Mono
Embarcadero (CodeGear)	JBuilder	The leading cross-platform environment for building industrial-strength enterprise Java applications.
Embarcadero (CodeGear)	3rdRail	An IDE that brings high efficiency coding and visualization tools to Ruby on Rails development and streamlines the creation of database-backed web applications while retaining the full dynamic nature of Ruby programming.
Embarcadero (CodeGear)	TurboRuby	An IDE that brings high efficiency coding and visualization tools to Ruby development and streamlines Ruby development while retaining the full dynamic nature of the Ruby language.
Embarcadero (CodeGear)	Delphi for PHP	A RAD visual PHP development environment that includes a powerful code editor, debugger, profiler, database tools and much more.
<b>Database Management and Monitoring Tools</b>		
Embarcadero	DBArtisan	A cross-platform database administration solution, helps DBAs maximize availability, performance and security. Supports all major database platforms.
Embarcadero	Rapid SQL	An integrated toolset of cross-platform database development environment for tuning and editing code.
Embarcadero	Change Manager	A tool to automate, manage, and track complex database schema changes.
<b>Tuning and Performance Tools</b>		
Embarcadero	Performance Center	A performance monitoring solution with customizable alert thresholds, historical reporting, and highly readable status information.
Embarcadero	DB Optimizer	SQL profiling and tuning IDE that enables developers and DBAs to quickly discover, diagnose, and optimize poor-performing SQL.
Embarcadero	J Optimizer	Java profiling and tuning IDE for delivering high-performance, high-quality, scalable Java applications
<b>Embedded and Workgroup Databases</b>		
Embarcadero (CodeGear)	InterBase	A powerful database for embedded and business-critical small-to-medium enterprise server applications.
Embarcadero (CodeGear)	Blackfish SQL	A high-performance, small-footprint, SQL-92 compliant transactional database that runs on both the .NET framework and on the Java platform.
<b>EmbeddedPlus</b>		Suite of products that integrate and extend the functionality IBM/Rational products including ClearQuest, RSDP and DOORS; integrate DOORS with Eclipse framework-based products and plug-ins; and provide SysML language support
EmbeddedPlus	DoorKeeper for the Rational Development Platform	Provides a seamless integration between Telelogic DOORS® and the Rational Software Development Platform allowing teams to keep designs consistent with requirements
EmbeddedPlus	DoorKeeper for Eclipse	Integrates the Telelogic DOORS® requirements management tool into Eclipse-based environments.
EmbeddedPlus	DoorKeeper for ClearQuest	Integrates the Telelogic DOORS® requirements management tool with IBM Rational's ClearQuest change management tool.

**Spectrum Systems Product Catalog**  
**Key Manufacturers and Key Products**

**July 2010**

Manufacturer	Key Product / Category	Product Description
<b>EmbeddedPlus (con't)</b>		Suite of products that integrate and extend the functionality IBM/Rational products including ClearQuest, RSDP and DOORS; integrate DOORS with Eclipse framework-based products and plug-ins; and provide SysML language support
EmbeddedPlus	DoorKeeper for ClearQuest Change Proposal System	Allows users to propose and commit changes to requirements stored in Telelogic DOORS® using IBM Rational ClearQuest's record life cycle.
EmbeddedPlus	SysML Toolkit	An add-in product to the IBM RSDP that provides SysML language support and related features to IBM Rational Software Modeler/Architect (RSM/RSA) and Rational Systems Developer (RSD).
EmbeddedPlus	Simulation Toolkit	An add-in product to the IBM RSDP that provides the ability to simulate and execute UML2 and SysML models created using Rational Software Modeler/Architect, Rational Systems Developer (RSD) and the EmbeddedPlus SysML Toolkit.
EmbeddedPlus	DO-178B Safety Critical Framework	Provides a framework for running applications in which C or C++ code is generated from a model driven development tool.
<b>Enterprise Elements</b>		Database repository tool to manage large quantities of Enterprise Architecture and EA-like data in the context of a managed, full-lifecycle process
Enterprise Elements	Elements Repository	A scalable Web-based solution specifically designed for the management and analysis of dynamic, highly-interrelated data and metadata featuring configurable database-like platform that allows the rapid construction of complex enterprise-ready systems
Enterprise Elements	Elements Inside	A Rapid Application Development (RAD) tool for Oracle that facilitates rapid development and deployment of enterprise Oracle applications.
Enterprise Elements	DoDAF Elements	A CADM-compliant repository that facilitates the consistency, correctness and completeness of DoDAF views and products across multiple modeling tools from various vendors, with various metamodel implementation variants.
<b>HP Software (Mercury)</b>		A portfolio of Business Technology Optimization solutions that addresses business and IT alignment, application quality management, service management, and data center transformation
HP Software	HP Application Security Center	HP Application Security Center offers web application security software that finds security vulnerabilities at every phase of the software development lifecycle. <b>Products include:</b> HP Assessment Management Platform, HP DevInspect, HP QAInspect, HP WebInspect
HP Software	HP Business Availability Center	HP Business Availability Center allows you to optimize the availability, performance and effectiveness of business services and applications. <b>Products include:</b> HP Business Availability Center Software for Composite Application Management, Business Process Insight, Business Process Monitor, HP Business Service Level Management, HP Diagnostics, HP Discovery and Dependency Mapping, HP End User Management, HP Problem Isolation, HP Real User Monitor, HP SiteScope, HP Universal CMDB Software, HP System Availability Management, HP TransactionVision
HP Software	HP Client Automation Center	HP Client Automation Center helps you manage client devices effectively and efficiently, reduce operational costs, improve quality of service, and keep clients secure and compliant. <b>Products include:</b> HP Client Automation Enterprise, HP Client Automation Standard
HP Software	HP Data Center Automation Center	HP Data Center Automation Center helps you automate IT management, provision new infrastructures and manage change and compliance in your data center to dramatically improve cost efficiency and reduce risk. <b>Products include:</b> HP Business Service Automation Essentials, HP Discovery and Dependency Mapping, HP Network Automation, HP Operations Orchestration, HP Release Control, HP Server Automation, HP Service Automation Reporter, HP Service Automation Visualizer, HP Storage Essentials Performance Edition, HP Storage Essentials Storage Resource Management, HP Storage Essentials, HP Universal CMDB

**Spectrum Systems Product Catalog**  
**Key Manufacturers and Key Products**

**July 2010**

Manufacturer	Key Product / Category	Product Description
<b>HP Software (Mercury) (con't)</b>		
HP Software	HP Network Management Center	<p>A portfolio of Business Technology Optimization solutions that addresses business and IT alignment, application quality management, service management, and data center transformation</p> <p>HP Network Management Center helps you increase service levels to business users, align IT with business objectives and decrease your IT cost structures.</p> <p><b>Products include:</b> HP NetFlow Collector for Report Pack for NetFlow Interfaces, HP Network Node Manager (NNM) Advanced Edition, HP Network Node Manager (NNM) Starter Edition, HP Network Node Manager i, HP Operations Support Systems Portfolio, HP Performance Insight, HP Report Pack Gallery, HP Report Pack for Cisco Wireless LAN, HP Report Pack for Radius Call Detail v 1.3, HP Route Analytics Management, HP TeMIP Software</p>
HP Software	HP Operations Center	<p>The HP Operations Center helps you optimize the management of technology across IT domains – and provide a reliable service infrastructure to your business teams.</p> <p><b>Products include:</b> HP Discovery and Dependency Mapping, HP GlancePlus Pak, HP Operations Manager Dependency Mapping Automation, HP Operations Manager for BlackBerry Enterprise, HP Operations Manager i 8.10, HP Operations Manager, HP Operations Smart Plug-ins, HP Performance Manager, HP Reporter, HP SiteScope, HP Universal CMDB</p>
HP Software	HP Performance Center	<p>HP Performance Center helps you validate and analyze the performance of your applications against business requirements – and mitigate the risk associated with application deployment and upgrades.</p> <p><b>Products include:</b> HP Center Management for Performance Center, HP Diagnostics, HP LoadRunner Monitors, HP LoadRunner (sometimes mistakenly called RoadRunner)</p>
HP Software	HP Project & Portfolio Management Center	<p>HP Project and Portfolio Management (PPM) Center standardizes, manages and captures the execution of project and operational activities.</p> <p><b>Products include:</b> HP Deployment Management module, HP Discovery and Dependency Mapping, PPM Demand Management, PPM Financial Management, PPM Portfolio Management, PPM Program Management, PPM Program Management module, PPM Resource Management module, PPM Time Management module, HP Universal CMDB software</p>
HP Software	HP Quality Center	<p>HP Quality Center manages and governs quality processes – and automates software testing across your IT and application environment.</p> <p><b>Products include:</b> HP Business Process Testing for Oracle environments, HP Business Process Testing for SAP environments, HP Business Process Testing, HP Center Management for Quality Center, HP Change Impact Testing for SAP Applications, HP Functional Testing, HP Quality Center, HP QuickTest Professional, HP Requirements Management, HP Service Test Management, HP Service Test</p>
HP Software	HP SOA Center	<p>HP SOA Center helps you accelerate your SOA transformation by managing and governing the service lifecycle.</p> <p><b>Products include:</b> HP Discovery and Dependency Mapping, HP SOA Governance Interoperability Framework (GIF), HP SOA Governance Interoperability Framework (GIF), HP SOA Registry Foundation, HP SOA Systinet , HP Universal CMDB software</p>
HP Software	HP Service Management Center	<p>HP Service Management Center is a comprehensive, ITIL-based solution for IT service, asset and identity, and access-management.</p> <p><b>Products include:</b> HP Asset Manager, HP Connect-It, HP DecisionCenter, HP Discovery and Dependency Mapping, HP Service Manager, HP Universal CMDB software</p>

**Spectrum Systems Product Catalog**  
**Key Manufacturers and Key Products**

**July 2010**

Manufacturer	Key Product / Category	Product Description
<b>IBM Software</b>		A portfolio of application development, information management, collaboration, IT service management and SOA tools
IBM Software	Rational Software (including Telelogic)	<p>The IBM Rational systems and software delivery platform provides the tools and processes to help you develop and deliver successful software-intensive projects ranging from embedded software products and systems for electronics, to in-vehicle software for automobiles, to net-centric systems for aerospace and defense.</p> <p><b>Products include:</b> AppScan, AssetManager, Application developer for WebSphere, Application Performance Analyzer, Build Forge, Business Developer, ClearCase, ClearQuest, Dashboard, Developer, DOORS, WebSphere Development Studio, Focal Point, Functional Tester, Insight, Rational Lifecycle Package, Logiscope, Modeler, Performance Tester, Policy Tester, Portfolio Manager, Purify, PurifyPlus, Quality Manager, Requirements Composer, RequisitePro, Rhapsody, Robot, Rose, Service Tester for SOA QUALity, SoDA, Software Analyzer, Software Architect, System Architect, Systems Developer, Systems Tester, Tau, Team Concert, Team Webtop, Test Lab Manager, TPF Toolkit, VisualAge</p>
IBM Software	Tivoli Software	<p>A platform to manage infrastructure, operations and IT processes</p> <p><b>Products include:</b> Access Manager, Asset Discovery, Business Continuity Process Manager, Business Service Manager, Change and Configuration Management Database, Compliance Insight Manager, Composite Application Manager, Configuration Manager, Data and Application Security, Data Warehouse, Secision Support, Directory Integrator, Directory Servicer, Enterprise Console, Federated Identity Manager, Foundations, Information Archive, Identity manager, Key Lifecycle Manager, License Compliance Manager, Maximo, Monitoring, Netcool, NetView, Network Manager, OMEGAMON, Performance Analyzer, Point-of-Sale Manager, Provisioning Manager, Release Process Manager, Remote Control, Security Manager, Service Automation Managemer Service Level Advisor, Service Request Manager, Storage Manager, Storage Productivity Center, System Automation, Workload Scheduler, zSecure</p>
IBM Software	WebSphere Software	<p>Software for SOA environments that enables dynamic, interconnected business processes, and delivers highly effective application infrastructures for all business situations.</p> <p><b>Products include:</b> IBM ILOG CPLEX, IBM ILOG Elixir, WebSphere Application Server, WebSphere Datapower, WebSphere ILOG JRules, WebSphere MQ, WebSphere Process Server, Adapters, Business Compass, Business Events, Business Integration Server, Business Monitor, Commerce, Data Interchange, Developer, Message Broker, Partner Gateway, Portal, Real Time, Remote Server, Service Registry and Repository, Virtual Enterprise, XML Document Management</p>
IBM Software	Information Management Software	<p>Software helps you manage your data and content, pull together trusted information that cuts across diverse silos, and also gain valuable insights to optimize your business.</p> <p><b>Products include:</b> Cognos, Cloudscape, CommonStore, Content Analyzer, Content Integrator, Content Manager, DB2 Connect, DB2, Informix Dynamic Server, Rational Data Architect, FileNet, InfoSphere, OmniFind, Optim, UniData, UniVerse</p>
IBM Software	Lotus Software	<p>Security-rich software that enables businesses to communicate, collaborate and increase productivity.</p> <p><b>Products include:</b> Notes, Domino, Sametime, Connections, Quickr, Forms, Foundations, Web Content Management, LotusLive, Mashup Center, WebSpehere Portal, 1-2-3, Mobile Connect, Organizer, Protector for Mail Security, Symphony, Workforce Management, Workflow</p>
<b>Idera</b>		Tools for Microsoft SQL Server, SharePoint and PowerShell management and administration including performance monitoring, backup and recovery, security and auditing and PowerShell scripting
Idera	SQL compliance manager	An auditing and compliance solution for SQL Server environment providing pre-defined or customizable reports help to ease compliance with internal audit standards or federal regulations such as Sarbanes-Oxley, HIPAA, GLBA, The US Patriot Act and more
Idera	SQL diagnostic manager	Provides real time or historical SQL Server information organized into easy-to-understand, logical groupings and helps DBAs pinpoint and resolve the source of SQL Server problems
Idera	SQL defrag manager	Analyze, find and fix database index fragmentation issues across multiple SQL Servers.

**Spectrum Systems Product Catalog**  
**Key Manufacturers and Key Products**

**July 2010**

Manufacturer	Key Product / Category	Product Description
<b>Idera (con't)</b>		
Idera	SQL change manager	A change and configuration management tool that streamlines database change management procedures by capturing periodic database schema snapshots, highlighting changes from a baseline, and enabling easy roll-back, roll-out and recovery of lost or damaged database objects.
Idera	SQLsafe	A high performance backup and recovery solution for enterprise-scale SQL Server implementations providing fast compressed and secure encrypted data backup
Idera	SQL job manager	An enterprise-class job management tool for Microsoft SQL Server helps DBAs easily manage & view SQL Server job streams
Idera	SQL secure	Identify security issues in order to improve security and ensure compliance with corporate audit requirements.
Idera	SQL mobile manager	A portable monitoring and administration tool for SQL Server that enables database administrators to securely manage their SQL Server environments from a remote location using a Windows Mobile device such as a cell phone or PDA
Idera	SQL admin toolset	24 essential desktop tools for monitoring, troubleshooting, administering and reporting on your SQL Servers.
<b>IndustrialMedium</b>		
IndustrialMedium	Expressroom	XML-powered content management system that helps people build, deploy, and update large and complex Web sites. Expressroom's rich work environment satisfies the needs of content creators, managers, and developers alike.
IndustrialMedium	Expressroom IC	Built on Expressroom software, an XML-based content management system that reduces the cost and complexity of managing content. It enables you to achieve the goals of information-sharing and standards compliance, while minimizing the impact on analyst production.
IndustrialMedium	Document Assistant	A two-way solution that transforms files to XML, and it also transforms XML files back into their original formats.
<b>Inovis</b>		
On-demand business community management solutions that help companies optimize supply chain management through EDI / data exchange, data translation and data synchronization		
Inovis	Inovis Catalogue	A product data synchronization application that allows marketers, manufacturers and suppliers to share with retailers their latest product information, such as price, style, color, size and over 540 additional product attributes.
Inovis	BizManager	A secure, automated, managed data exchange and integration solution enabling enterprises to quickly connect, manage and exchange documents with a diverse community of transaction partners regardless of differing data formats or standards. Includes: BizLink and BizConnect
Inovis	Inovisworks	A Value-Added Network (VAN) service that supports a wide range of data formats as well as connectivity, access, transport and security options
Inovis	TrustedLink	Provides data transformation software that bridges the gap between you and your trading partners, so you can have a digital dialog regardless of differing data formats or standards.
<b>Jacada</b>		
Unified desktop and process optimization software solutions for call centers that bridge disconnected systems into a single, intelligent workspace, without requiring modification or replacement of existing systems		
Jacada	WorkSpace	Provides a single user interface to the mission-critical applications and tools required by customer service reps for effective customer interactions
Jacada	Fusion	A non-invasive process optimization platform that delivers process simplification, workflow automation, call scripting, a vast array of dashboards, reports, and alerts for call center reps and managers.

**Spectrum Systems Product Catalog**  
**Key Manufacturers and Key Products**

**July 2010**

Manufacturer	Key Product / Category	Product Description
	<b>Lancope</b>	An enterprise network security monitoring platform that combines flow-based anomaly detection and network performance monitoring into one integrated platform
Lancope	StealthWatch	A family of products that combines flow-based anomaly detection and network performance monitoring into a single, integrated enterprise platform for security and network operations. By delivering unified visibility across physical and virtual networks, StealthWatch eliminates network blind spots and reduces total network and security management costs.
	<b>McAfee</b>	Security software and appliances that provide protection for networks, systems, devices and data for enterprises of all sizes
McAfee	McAfee Total Protection for Data	Provides strong encryption, data loss prevention, authentication, and policy-driven security controls to protect critical data 24/7.
McAfee	McAfee Endpoint Encryption	Provides powerful encryption and strong access control to prevent unauthorized access to sensitive data and render it useless in the event of loss or theft.
McAfee	McAfee Host Data Loss Prevention	Monitors and controls how employees use and transfer business data through all channels—in the office, at home, and on the move.
McAfee	McAfee Device Control	Monitors and restricts data copied to removable storage devices and media to keep it from leaving company control.
	<b>MetaVis</b>	A suite of products to create, manage and migrate SharePoint 2010, 2007 and 2003 taxonomies and content and organize and re-organize SharePoint environments.
MetaVis	MetaVis Architect for SharePoint	Makes it easy to create, deploy, organize and manage SharePoint 2010, 2007 or 2003 sites. Its intuitive, graphical interface lets you create SharePoint taxonomies quickly.
MetaVis	MetaVis Classifier for SharePoint	A bulk re-organization tool for SharePoint content. Assign new metadata values and new content types; move files to different folders, lists, sites or servers; or do both at the same time. Make your SharePoint 2010, 2007 and 2003 content compliant, manageable and "findable" with just a few clicks.
MetaVis	MetaVis Folders for SharePoint	A SharePoint control that automates tagging and classification by copying folder metadata to any content stored inside. Collect more metadata about your SharePoint 2010, 2007 and 2003 content without increasing the work for your content authors.
MetaVis	MetaVis Migrator for SharePoint	A simple tool for migrating content and objects between SharePoint sites, site collection or servers that provides a convenient and familiar way of moving SharePoint data. Users can also easily load files from network drives and classify legacy or imported content to unlock the full potential of SharePoint search and navigation.
MetaVis	MetaVis ECM Migrator for SharePoint	A simple tool for EMC Documentum eRoom to Microsoft SharePoint 2007 migration that allows you to quickly and easily migrate eRoom objects into SharePoint 2007 using prebuilt default mapping.
MetaVis	MetaVis Site Creator for SharePoint	Simplifies the creation and installation of customized SharePoint templates. Install a completely configured SharePoint site in minutes using professionally designed templates containing pre-configured taxonomies, fields, content types, lists and subsites.
	<b>Micro Focus (includes former Borland and Compuware products)</b>	A portfolio of application development, application modernization, application portfolio management, and testing & software quality products
Micro Focus	Application Middleware	Provides contemporary and highly productive development environments for the creation, maintenance and extension of enterprise applications. <b>Products include:</b> VisiBroker, Application Server for J2EE
Micro Focus	Application Modernization Products	Enables you to migrate selected applications to alternative servers in order to operate and modernize them in the most optimal fashion. <b>Products include:</b> Micro Focus Rumba, Micro Focus OnWeb, Micro Focus ViewNow
Micro Focus	Application Lifecycle Management	Manage and improve software delivery through Open Application Lifecycle Management (Open ALM). <b>Products include:</b> CaliberRM, Caliber Analyst, DevPartner, Optimal Trace, QADirector, QALoad, SilkCentral Test Manager, SilkPerformer, SilkTest, StarTeam, Team Analytics, TeamDefine, Team Demand, TestPartner, Together

**Spectrum Systems Product Catalog**  
**Key Manufacturers and Key Products**

**July 2010**

Manufacturer	Key Product / Category	Product Description
	<b>MKS</b>	Application lifecycle management (ALM) solutions that help companies manage software development activities through a single enterprise application
MKS	MKS Integrity	A single, coherent enterprise application that offers end-to-end application lifecycle management
	<b>netForensics</b>	Security information management and log management software, appliances, and managed security solutions for small, midsize, and large organizations
netForensics	nFX Cinxi One	Combines log management, real-time event correlation and alerting, remediation, and reporting in a single high performance solution that simplifies the time-consuming task of monitoring and managing the compliance and security risks that can affect your business operations.
netForensics	nFX SIM One	An enterprise Security Information Management (SIM) solution that helps you centrally collect and manage security and network data, in order to quickly identify and respond to threats and address compliance challenges.
	<b>NewsGator</b>	Collaborative computing solutions for communities of practice, learning, professional development, and knowledge management that help government organizations meet Open Government Initiatives.
NewsGator	Social Sites for SharePoint 2007 (MOSS) and SharePoint 2010	Create rich social profiles, share ideas and expertise, and effectively communicate with colleagues using all of the most promising features from consumer social networking and community software - Social Sites makes SharePoint social.
NewsGator	Tomoye	The future of communities of practice, collaboration, and social learning with support for DoD security standards, accessibility standards such as section 508.
	<b>Pragmatica Innovations</b>	Enterprise-level solutions for data modeling, visualization, analysis, and optimization
Pragmatica Innovations	Data Enabled Enterprise Modeler (DE2M)	An enterprise modeling solution that combines the utility & flexibility of Microsoft Visio with Oracle's relational database power.
Pragmatica Innovations	Data Enabled Enterprise (DE2) Repository	A fully web enabled, enterprise level repository for visualization, rapid analysis and optimization.
Pragmatica Innovations	Visio Stencil Sets	A variety of Microsoft Visio stencils 'data enabled' for DE2M are available or can be custom built to your design.
	<b>R1Soft</b>	Continuous data protection (backup, restore, and disaster recovery) solutions for Windows and Linux server data protection
R1Soft	Windows CDP	High performance disk to disk backup software for Windows servers with central management and data repository
R1Soft	Linux CDP	High performance disk to disk backup software for Linux servers with central management and data repository
	<b>Safecore (InBoxer)</b>	Products and solutions for email archiving, electronic discovery, content monitoring and virtual data rooms - available as an on-site appliance, VMWare virtual appliance software, or a fully hosted and managed service.
Safecore (InBoxer)	InBoxer At-Risk Appliance	An intelligent email archiving and retrieval system that speeds up investigations, reduces litigation costs, manages policy risks, and cuts IT operational expenses.
	<b>SCO</b>	UNIX-based business computing platforms for distributed, embedded, network-based, and mobile computing environments
SCO	OpenServer	UNIX operating system
SCO	UnixWare	UNIX operating system for enterprises
	<b>Security Innovation</b>	Secure software lifecycle management solutions that help companies to build and deploy secure software applications and reduce information risk
Security Innovation	NEO for Java	The smallest and fastest public key-based Java security product in the world, providing encrypted data transfer and user authentication services that overcome these historic constraints.
Security Innovation	NEO for C	A public key cryptography system (PKCS) that provides application developers the tools to ensure confidentiality, authentication, and integrity in any C/C++ environment
Security Innovation	NXP Libraries	A software-based encryption solution optimized specifically for general-purpose ARM7/ARM9 microcontrollers.
Security Innovation	CxDeveloper	Advanced source code security testing
Security Innovation	CxAudit	Interactive source code analysis and query development

**Spectrum Systems Product Catalog**  
**Key Manufacturers and Key Products**

**July 2010**

Manufacturer	Key Product / Category	Product Description
<b>Security Innovation (con't)</b>		Secure software lifecycle management solutions that help companies to build and deploy secure software applications and reduce information risk
Security Innovation	eLearning (TeamProfessor)	An eLearning system that delivers expert knowledge in a cost-effective manner without compromising technical depth - covering security topics including: secure development, security testing, software security awareness, process / design.
Security Innovation	TeamMentor	A Web-based software security learning and knowledge management system, providing each development team member complete security guidance up front and as they code.
<b>SonicWALL</b>		Network security, secure remote access, Web and e-mail security, continuous data protection, and policy and management solutions for enterprises of all sizes
SonicWALL	E-Class Solutions	Enterprise-class, comprehensive solutions for Network Security, Secure Remote Access, Email Security and Policy and Management.
SonicWALL	UTM / Firewall / VPN	A family of network security appliances that combines Deep Packet Inspection with robust Unified Threat Management (UTM) security services, to provide small, mid-size and enterprise-class organizations with the advanced protection they need.
SonicWALL	Endpoint Security	Endpoint security solutions that provide anti-virus, anti-spyware, anti-spam and anti-phishing protection to network servers, desktops and laptops.
SonicWALL	SSL VPN Secure Remote Access	Secure remote access to resources from virtually any end point—including desktops, laptops, PDAs and smartphones.
SonicWALL	Anti-Spam / Email Security	An anti-spam, anti-virus, anti-phishing, policy, and compliance management e-mail protection solution. Available as a hardened appliance or as Windows software.
SonicWALL	Content Security Manager Series	Content security web security and internet threat protection solutions that integrates real-time gateway anti-virus, anti-spyware, intrusion prevention and content filtering.
SonicWALL	Backup & Recovery	A complete end-to-end backup and recovery solution for SMBs
SonicWALL	Centralized Management & Reporting	A comprehensive architecture for centrally creating and managing security policies, providing real-time monitoring and alerts, and delivering intuitive compliance and usage reports, all from a single management interface.
<b>TestPlant</b>		QA automation and software testing solution
TestPlant	eggPlant	A low-overhead, non-invasive black-box test and process automation tool.
<b>Verdasys</b>		An enterprise information protection solution that protects and manages the flow of data and prevents information leakage across the global enterprise, including the extended partner/supply chain
Verdasys	Digital Guardian	An enterprise level information security platform that protects against the misuse, compromise or loss of data across the enterprise.
<b>Vericept</b>		Security compliance and data loss prevention solutions providing enterprise-wide discovery, classification and prevention of the information exchanged inside and outside an organization
Vericept	Vericept Monitor	Passively analyzes all Internet-based communication and attachments mitigating violations of a company's corporate data governance, regulatory requirements.
Vericept	Vericept Protect	Defends against unauthorized data loss over corporate email messages and attachments, through automated and customizable actions allowing for encryption, quarantining or blocking messages.
Vericept	Vericept Discover	Investigates data at rest to find and protect sensitive information.
Vericept	Vericept Edge	An endpoint data leak prevention solution that enables organizations to discover, classify and apply continuous monitoring on sensitive data, even when the user is disconnected from the network.
