

FORECAST from CLOUDONE®

# Lose your indecision. Not your money.

Face it: trying to decide what project you should do next is often just an overblown e-mail argument. With all the ideas to consider, and all the people who want to weigh in, you're often left wondering if your newest project will kill the competition – or just kill your budget.

## Until now.

Introducing **Project Decision Support from the Cloud** with **Forecast from CloudOne**. It's the total solution to helping you prioritize and roadmap project starts and plans that's easy, affordable and simple. Based on IBM Rational Focal Point, it centralizes the information that's key to making good decisions, like status reporting and reviews, so you can escape the chaos of managing project plans in e-mails and spreadsheets.

Most importantly, it allows you to invest everyone in the decision making process, through simple voting and ranking, that overcomes the influence of the "loudest voice in the room" and helps you make objective plans that are innovative, valuable and achievable.

**CloudOne**

*DEVELOP HIGHER*

[OnCloudOne.net](http://OnCloudOne.net)

CloudOne is the leader in lifting software and systems development on to the Cloud.

We elevate development team collaboration through secure Virtual Private Clouds, available at anytime to everyone, everywhere. We boost cost savings by filling Clouds dynamically with market-leading IBM Rational development tools through Software-as-a-Service. And, we raise productivity and quality through our CloudOne Consortium partners. Learn more at <http://OnCloudOne.net>.

## Modern

A whiteboard and sticky notes only take you so far. **Forecast from CloudOne™**, built on the power of **IBM® Rational® Focal Point™**, provides your team with easy access to decision support software to help the organization select the best projects to undertake. And they better be the best: companies live or die on the wise use of limited resources.

## Evolving

As CloudOne Forecast moves into the future, we're proud to enhance it with the capabilities of **IBM Rational Insight™**. With Insight, your team can access a single Web-based view to accurate real-time project and process performance information, including baselines, averages and goals. This means everyone is always "in the know."

## Simple

CloudOne Forecast will not make you the company meteorologist, but it will greatly enhance your company's ability to compete in the marketplace. The Cloud provides access to everyone - even people who aren't traditionally part of software development - in order to gather the best ideas from every corner of your organization. The best part? It's as simple as opening your web browser.
