

# POWER TOOLS FOR SHAREPOINT ADMINISTRATORS AND DEVELOPERS

## SharePoint productivity toolbox™

POWERFUL, TIME-SAVING SOLUTION

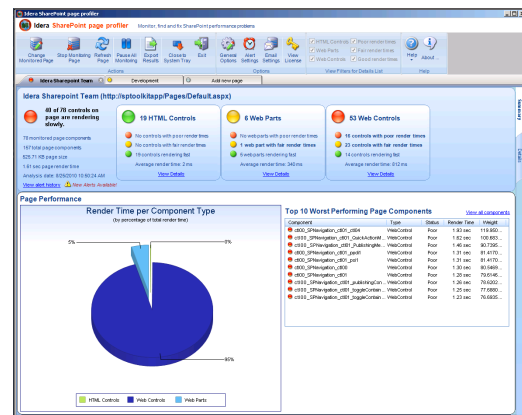

The Idera SharePoint productivity toolbox is a powerful, time-saving solution for SharePoint developers and administrators. It combines Idera PowerShell Plus™ - the market leading development environment for Windows PowerShell - enabling SharePoint professionals to effectively leverage all PowerShell cmdlets for SharePoint, and Idera SharePoint page profiler™ to provide rapid detection of page performance problems. Together these two tools save countless hours of development and debugging time.

### HIGHLIGHTS:

- Provides accurate server-side SharePoint performance metrics.
- Quickly identifies worst performing SharePoint page controls.
- Manages SharePoint 2007 and SharePoint 2010 using the interactive PowerShell Plus console and script editor.
- Provides access to SharePoint scripts directly from PowerShell.com, Poshcode and TechNet script libraries.
- Executes SharePoint scripts across multiple SharePoint farms simultaneously.

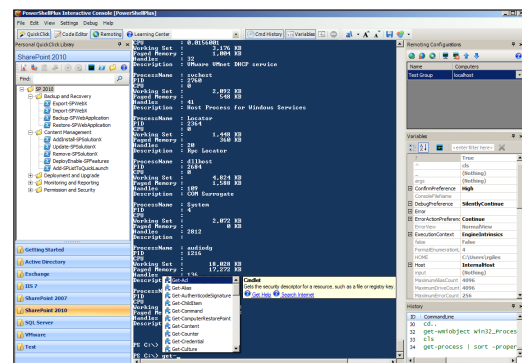

#### SharePoint page profiler .....

Idera SharePoint page profiler is a unique solution that enables SharePoint administrators and developers to monitor SharePoint pages, and quickly find and fix performance problems.

#### PowerShell Plus .....

Idera PowerShell Plus is the most advanced IDE for PowerShell available today featuring an interactive console, advanced script editor and debugger and a comprehensive learning center all integrated into a single product.

SharePoint productivity toolbox delivers both PowerShell Plus and SharePoint page profiler in one easy-to-install download, enabling you to get started in just minutes.

At just \$295, SharePoint productivity toolbox is an incredible value for both SharePoint administrators and developers. Download a free 14-day trial today and start saving hours of time performing day-to-day SharePoint tasks.

# SharePoint productivity toolbox™

## POWER TOOLS FOR SHAREPOINT ADMINISTRATORS AND DEVELOPERS

### SharePoint page profiler™

#### TECHNICAL FEATURES

**Powerful Worst performing Page controls view:** Provides a powerful overview of the worst performing page controls, with respective statuses, loading time and size.

**Page level statistics:** Provides instantaneous page level statistics for page size, status and execution time, number of controls, average control execution time, and much more.

**Full web page coverage:** Provides granular, server-side performance data analysis for all MOSS publishing and WSS web part pages such as server controls, web parts, images, scripts, and much more.

**Alerts:** Automated Email alert notification whenever a threshold has been reached.

**Threshold customization:** Customize HTML, web parts and web control alerting thresholds to meet the performance requirements of your applications and environment.

**Scheduler:** Automated scheduler for continuous performance analysis of a web page.

**Easy URL based page analysis:** Analyze any web page within your farm by just defining the web page URL.

**Easy to use UI:** Powerful and easy to use console, enables complex analysis to be achieved in seconds, without the need to be a SharePoint developer expert.

**System tray operation:** Resides in the system tray for continuous web page monitoring enabling easy identification of page statuses plus console and email alerting.

### PowerShell Plus™

#### TECHNICAL FEATURES

**Interactive PowerShell Console:** Work interactively with Windows PowerShell from a feature rich Windows UI.

**Powerful Script Library:** The console includes a completely customizable QuickClick™ Library, which organizes scripts and commands that can be executed by the console. The library comes complete with sets of scripts for a variety of platforms including SharePoint 2010.

**Windows PowerShell Remoting Support:** Establish interactive remote sessions and execute scripts remotely onto any computer that has PowerShell v2 installed and WinRM configured.

**Comprehensive Learning Center:** guides users through PowerShell concepts and examples. Includes dynamically created help topics from installed PowerShell CmdLets, Snap-Ins and WMI objects.

**Advanced Code Editor:** The advanced debugger and script editor enables users to build and test complex PowerShell scripts, try one line PowerShell commands from an embedded console window, and sign their script with a security certificate from a single workspace.

**Code Sharing:** Easily share your code with the PowerShell community by submitting scripts to PowerShell.com directly from the PowerShell Plus console or editor.

**Access scripts directly from the console and editor:** Quickly and easily download scripts from PowerShell.com, Poshcode and TechNet script libraries.

**Code completion:** Intellisense-style code completion speeds up script development in both the PowerShell Plus console and editor.
