

## SITE CREATOR for SharePoint

**MetaVis SITE CREATOR** for SharePoint simplifies the creation and installation of customized SharePoint templates. A site manager can install a completely configured SharePoint site in minutes using professionally designed templates containing pre-configured taxonomies, fields, content types, lists and sub-sites. Site Creator allows companies to have governance over their SharePoint Site Deployments ensuring compliance and uniformity.

**MetaVis SITE CREATOR** for SharePoint enables organizations to:

- **Ensure Governance** - Consisting of sites, sub-sites, content types, lists and libraries, templates ensure that a carefully designed taxonomy is used throughout the SharePoint environment. Templates can be created using MetaVis ARCHITECT or downloaded from our web site.

- **Compliant** - By providing users with a set of best-of-breed templates, IT ensures that consistent standards are followed and SharePoint growth is managed.
- **Easy to Use** - Based on a wizard driven interface, users are guided through template selection, list and library customization and finally provisioning to SharePoint.

- **Wizard-Driven Interface** - guides users through the process of selecting templates, customizing settings and finally deploying into SharePoint
- **Template Customization** - override existing site, list, and library settings to configure templates for specific needs
- **Templates** - several templates included, other templates may be downloaded or created using MetaVis Architect
- **SharePoint Deployment** - deploy new sites by selecting its parent site from a graphical interface or send to administrator for provisioning.
- **No Server-Side Installation Required** - all operations are done using SharePoint web services
