

InBoxer Anti-Risk Appliance

Email Archiving, Fast Legal Search, Easy Export, and Real-Time Alerts

School districts and local governments are under greater pressure to retrieve email and to monitor email content than most businesses. Despite limited IT resources and budgets, it is expected that schools and governments will accurately and quickly comply with the rules and law. Here are some of the facts:

- Between 50% and 100% of all civil litigation involves producing email as evidence. The Federal Rules of Civil Procedure and many state requirements provide strict time limits for accurate disclosure.
- Open meeting laws often require the disclosure of mail between a majority of Board members.
- Freedom of Information requests require fast response. In some locales, it is required within 24 hours.
- Threats of violence and sexual emails require fast action – even if the recipient is away from his desk.

The InBoxer® Anti-Risk Appliance 3000 series is an intelligent archiving and retrieval system that speeds up investigations, reduces litigation costs, manages policy risks, and cuts IT operational expenses.

In addition to accurately copying, indexing, and storing your critical electronic messages, InBoxer is optimized to reduce searching and retrieval time, which translates to lower costs. InBoxer's state-of-the-art searching technology enables you to find exactly what you need without wasting time. InBoxer hardware is EPA Energy Star certified to protect the environment and further lower costs through superior energy efficiency.

We have money-saving configurations specifically available for schools and local governments. We will even pre-configure the system at no additional cost so you do not need to worry about your available staff. You will save money and save time with the InBoxer Anti-Risk Appliance.

“well-done e-mail archiving and searching, plus real-time policy management alerts, makes it fast and easy to stay in compliance and conduct investigations.” — InfoWorld

InBoxer Anti-Risk Appliance

Features

ARCHIVED MESSAGE TYPES:

- Archives multiple servers and multiple message types simultaneously.
- Microsoft Exchange, IBM Lotus Domino, First Class, Kerio, UNIX POP3, and more
- Bloomberg Messaging, AIM, Yahoo IM, Google Talk, ICQ, IBM Lotus Sametime, Windows LiveMessenger, and more*

ARCHIVE CAPABILITIES:

- Reliable "never miss a message," low overhead, journal based copies
- Message compression
- Single instance message storage
- Time-based retention schedule

SEARCH CAPABILITIES:

- Pre-Search™ advanced language technology speeds retrieval of the 80+ items searched most often, e.g., senders, recipients, social security numbers, confidential information, and offensive content.

- Full text index of the entire message, including body, headers, metatext, and attachments.
- Search text in any attachment, including Microsoft Office, PDF, ZIP files, and more.
- Search key words and phrases using:
 - Exact match
 - Single or multiple character wildcards
 - Boolean expressions
 - Proximity search (within x words)
 - Fuzzy search (similar spelling)
 - Complex, multi-step search
- Saved searches: Run a search once and set it to run again at defined intervals.

BUILT-IN DATA PROTECTIONS:

- On-board mirrored (RAID 5 or 6) storage
- Automated second copy to existing network back-up or WORM (optical) storage
- Unlimited expansion via SAN or iSCSI
- Optional off-line copy at Safecore's secure hosted storage facility
- Two 2-port high speed Gigabit NICs
- Dual power supplies (most models)

LITIGATION SUPPORT

- Fully integrated litigation hold
- Message tagging and reviewer notes
- Export in industry standard format for use by case management software
- Audit trail

COMPLIANCE AND REAL-TIME ALERTS:

- Policy based, real-time monitoring
- Automated warnings to sender, recipient or management for policy violations
- Random sampling and review
- Pre-defined policy categories (80+)
- Customer defined policy categories for watch list, key word, domain, and more

INBOXER EXCLUSIVES:

- Pre-Search™ for ultra-fast retrieval
- GoTheDistance™ Software Updates, includes all updates and new versions
- GoTheDistance Active Monitoring remotely diagnoses and solves problems
- RedGlove™ on-site hardware support

*Contact Safecore for details.

Our exclusive Pre-Search technology speeds results for more than 80 of the most useful searches.

Integrated Compliance and Litigation Hold capabilities make it easy to produce and export the results you need, even under tight deadlines.

Build simple or complex searches with powerful fuzzy and proximity search commands.

Create real-time alerts for policy management or schedule updates for any search.

The screenshot shows the InBoxer web interface with navigation tabs: Home, Compliance, Litigation Hold, Favorites, Search, Setup and Alerts, and Administration. The 'Search' tab is active, displaying a 'Custom Search' window. The search results table is as follows:
