

Digital Guardian

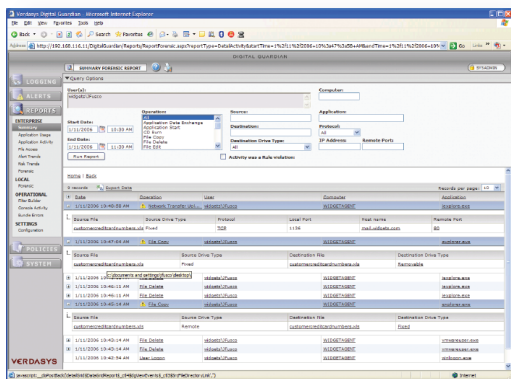

COMPLIANCE & PRIVACY ASSURANCE

Digital Guardian's Compliance and Privacy Assurance Solution Pack is an optional package of pre-written rules that greatly extends Digital Guardian's core "Point of Use" control, monitoring, and auditing capabilities, to focus specifically on protecting data associated with privacy issues and related regulations. The Compliance and Privacy Pack makes it easy to configure Digital Guardian to protect private information, and/or sensitive files and other data (including private customer information, patient information, employee information, medical records, insurance records, etc.). This data can represent a significant portion of a company's information assets, and protecting it is an essential part of maintaining trust with individuals, and meeting the specific requirements of government regulations such as HIPAA and GLBA.

PROTECT INFORMATION SHARED WITH PARTNERS AND SUPPLIERS – WORLDWIDE

Digital Guardian's Compliance and Privacy Assurance Solution Pack is capable not only of controlling and tracking private information use inside an organization, but also information that must, of necessity, be distributed and shared with suppliers and/or partners around the world. Using this Pack, companies can now quickly and easily configure Digital Guardian to monitor and limit specific user actions that put private data at greatest risk. For instance, protecting against illicit copying, transfer, printing, remote access and e-mailing of sensitive information.

CENTRALIZED MONITORING AND REPORTING

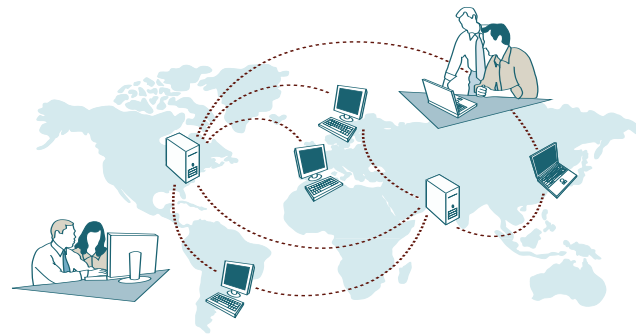

Detailed Online Query and Summarization Reporting for All Alerts and User Transactions

PROVIDES INTEGRATED VISIBILITY AND CONTROL

Digital Guardian's Compliance and Privacy Assurance Solution Pack functionality is tightly integrated with the extensive analytics and drilldown reporting capabilities of Digital Guardian's Console Server. The Pack captures actions by end-users of sensitive, private information, and maintains a detailed record of what is subsequently done with that information. This gives systems administrators and managers top-level, as well as granular, visibility into user transactions involving private information.

PRIVATE DATA PROTECTION FOR THE GLOBAL ENTERPRISE

Digital Guardian's Compliance and Privacy Assurance Solution Pack Makes It Easy to Protect Private Information Shared With Employees, Partners and Suppliers On a Global Basis.

Protect Confidential Documents: Monitor and protect documents containing sensitive and/or private information including employee records, customer data, and financial records.

Protect Patient Lists and Medical Records: Restrict the copy and transfer of private medical information and patient records.

Track the Flow of Private Data: Centrally control and monitor the flow of private data anywhere in the world.
